

| Language/Library | Creator                                                                                          |
|------------------|--------------------------------------------------------------------------------------------------|
| Java             | James Gosling and his team at Sun Microsystems                                                   |
| Python           | Guido van Rossum                                                                                 |
| Numpy            | Travis Oliphant (based on the earlier Numeric library by Jim Hugunin)                            |
| Pandas           | Wes McKinney                                                                                     |
| Matplotlib       | John D. Hunter                                                                                   |
| Seaborn          | Michael Waskom                                                                                   |
| Plotly           | The Plotly team (initially developed by Alex Johnson and Chris Parmer)                           |
| Beautifulsoap    | Leonard Richardson                                                                               |
| Pillow           | Alex Clark (as a fork of the Python Imaging Library (PIL) originally developed by Fredrik Lundh) |
| R Programming    | Ross Ihaka and Robert Gentleman                                                                  |
| Tidyverse        | Hadley Wickham                                                                                   |
