

✖ What is a Stylesheet (CSS)?

CSS stands for **Cascading Style Sheets**.

It is used to **style and format** the appearance of HTML elements on a webpage.

💡 *Think of HTML as the structure (skeleton), and CSS as the design (clothes & colors).*

◆ Why Use CSS?

- To control **layout, colors, fonts, spacing**, etc.
 - To make websites **attractive** and **consistent**.
 - To separate **content (HTML)** from **presentation (CSS)**.
-

◆ Ways to Add CSS

1. Inline CSS

CSS written directly in the HTML tag using the `style` attribute.

```
<p style="color: blue; font-size: 18px;">Hello World!</p>
```

2. Internal CSS

Defined inside the `<style>` tag within the `<head>` section.

```
<head>
  <style>
    p {
      color: red;
      font-size: 20px;
    }
  </style>
</head>
```

3. External CSS

Linked using a separate `.css` file — best practice for large projects.

```
<link rel="stylesheet" href="styles.css">
```

styles.css

```
p {
  color: green;
  font-size: 22px;
```

}

◆ Basic CSS Syntax

```
selector {  
  property: value;  
}
```

Example:

```
h1 {  
  color: purple;  
  text-align: center;  
}
```

- **selector** → HTML element (`h1`)
- **property** → What you want to change (`color`)
- **value** → How you want it to look (`purple`)

◆ Common CSS Properties

Property	Description	Example
color	Text color	color: blue;
background-color	Background color	background-color: yellow;
font-size	Text size	font-size: 18px;
font-family	Font style	font-family: Arial;
text-align	Text alignment	text-align: center;
margin	Space outside element	margin: 10px;
padding	Space inside element	padding: 5px;
border	Adds border	border: 1px solid black;
width / height	Set element size	width: 100px; height: 50px;

◆ CSS Selectors Examples

Selector	Example	Meaning
Element	p {}	All <p> tags
ID	#header {}	Element with id="header"
Class	.box {}	Elements with class="box"
Universal	* {}	All elements
Descendant	div p {}	<p> inside <div>

◆ Example (Full HTML + CSS)

```
<!DOCTYPE html>
<html>
<head>
  <title>Basic Stylesheet Example</title>
  <style>
    body {
      background-color: lightyellow;
      font-family: Arial;
    }
    h1 {
      color: darkblue;
      text-align: center;
    }
    p {
      color: brown;
      font-size: 18px;
    }
  </style>
</head>
<body>
  <h1>Welcome to CSS Basics!</h1>
  <p>This is a paragraph styled with CSS.</p>
</body>
</html>
```
